CMYK Distributors to Debut Revolutionary Filter Klear™ Fountain Recycling System at Graph Expo 2011

Visit Booth #439 to see the Filter Klear™ Fountain Recycling System first-hand

Weymouth, MA- September 6, 2011 – CMYK Distributors, Inc. is delighted to announce that they will debut the Filter Klear™ Fountain Recycling System at Graph Expo 2011 in Chicago, IL from September 11 – 14, 2011 in the Digital Information Booth #439. Last month, CMYK Distributors became the exclusive U.S. distributor of Filter Klear™ Fountain Recycling System, a product by Keystone Filtration Solutions, a Met-Pro Filtration/Purification technologies business.

Filter Klear™ is an innovative new product which prevents dust and gunk in water trays, enhances print quality, provides better hickey control, less plate wear, and less plate scumming and tinting. And, it is made in the U.S.A. With the Filter Klear™ Fountain Recycling System, the time spent cleaning dirty tanks and pans is virtually eliminated and fountain solution life is greatly increased.

“Filter Klear™ Fountain Recycling System is poised to revolutionize the printing and graphic industry and we look forward to demonstrating this remarkable system at Graph Expo 2011,” said Mark Williams, Director of Sales for CMYK Distributors. “The results we’ve seen are truly astounding. Our customers immediately realize less bacteria, less odor, less time wasted cleaning water trays and tanks. And, with zero discharge, Filter Klear is a clean *and* green solution.”

Utilizing advanced nanofiber technology featuring ceramic nanofibers on a micro-glass matrix, Filter Klear™ provides outstanding reduction of virus, bacteria, cysts, endotoxin and many other submicron particles through both electro-adhesion and mechanical processes. The Filter Klear™ system is lightweight and portable. It is easy to install and connects directly to the press via the air supply hose. Benefits include:

- ✓ Zero Discharge; Zero Waste of Incoming Water
- ✓ Biofilter Technology (cuts odor and bacteria)
- ✓ Reduces Press Downtime and Maintenance
- ✓ Decreases Fountain Solution Consumption and Disposal Costs
- ✓ Cost effective
