GRAPH EXPO 2012 ALERT

CMYK Distributors to Welcome Filter Klear ReKlaim I & II Worldwide Product Manager and Industry Veteran, Robert Werner, to Roster of On-site Experts at Digital Information Booth #448

Weymouth, MA- September 17, 2012 – CMYK Distributors, Inc. is delighted to announce that Keystone Corporation's Worldwide Product Manager for Filter Klear ReKlaim Fountain Solution Filtration System and thirty year industry veteran, Robert Werner, will be joining the distinguished roster of on-site thought leaders and industry experts at the Digital Information Booth #448 at Graph Expo 2012. Mr. Werner will be on-hand to demonstrate the U.S. printing industry's first harnessed, multi-tank, fountain recycling system, the Filter Klear ReKlaim II® by Keystone Corporation, a Met-Pro company.

Featuring advanced nanofiber technology with ceramic nanofibers on a micro-glass matrix, Filter Klear ReKlaim II®, as well as the single tank Filter Klear ReKlaim I®, provide outstanding reduction of calcium, virus, bacteria, cysts, endotoxin and many other submicron particles through both electro-adhesion and mechanical processes. The result is zero discharge and zero waste of incoming water while filtering particulates down to .002 microns.

The Filter Klear ReKlaim II® Multi-Tank Fountain Solution Filtration System enables the pressroom to filter and control multiple small tanks as if they were a single unit. Featuring an affordable harness system, Filter Klear ReKlaim II® addresses the needs of pressrooms with older multi-tank systems. Both Filter Klear ReKlaim I® & ReKlaim II® prevent dust and gunk in tanks and water pans which enhances print quality, provides better hickey control, less plate wear, and less plate scumming and tinting. The systems are lightweight and portable and easy to install. They connect directly to the press via an air supply hose. The units are manufactured, controlled, and warranted by Met-Pro and all working parts are made in the U.S.A.

Benefits include:

- Zero Discharge; Zero Waste of Incoming Water
- Outstanding Reduction of Calcium and Other Submicron Particles
- Biofilter Technology (cuts odor and bacteria)
- Reduces Press Downtime and Maintenance
- Decreases Fountain Solution Consumption and Disposal Costs
- Cost effective

Robert Werner will be available during Graph Expo 2012 for private consultations, product demonstrations, and to answer your questions. For more information on Filter Klear, please visit <http://www.cmykdistributors.com/filterklearabout.html> or stop by Booth #448 at Graph Expo 2012.
