CMYK Distributors to Demonstrate Latest Innovations in Waste Reduction Technology & Pressroom Automation at Graph Expo 2015

Weymouth, MA- September 9, 2015 – CMYK Distributors, Inc., the exclusive North American distributor of Digital Information’s InkZone ink-presetting and closed-loop technology, is the industry authority on products and services that bring automation to the pressroom, promoting sustainability by reducing pressroom waste and saving customers time and money. We are pleased to announce that we will be demonstrating the latest in waste reduction technology and pressroom automation in Booth #455 at Graph Expo 2015 in Chicago, IL from September 13 – September 16, 2015.

CMYK Distributors invites you to visit Booth #455 to check out live demonstrations of our products and to meet the foremost experts in the field of pressroom automation including Michael Haenni, President of Digital Information, Christoph Bugs, Chief Technology Officer for Digital Information, Mark Williams, Director of Sales for CMYK Distributors, and William Fabiano, Director of Technology for CMYK Distributors.

Our product line-up includes:

InkZone Ink-Presets & Closed Loop Solutions-

Digital Information’s InkZone Ink-Presets & Closed Loop Solutions delivers state-of-the-art ink key presetting and closed loop color control technology for all offset presses for substantially shorter make-ready time, reduced paper waste, and considerably-improved color quality.

The DJet-

The DJet is an innovative double-sided proofing system for the economical production of short runs featuring Epson quality, as well as an ultra-fast inkjet print solution for the output of double-sided imposition proofs. Capable of printing up to 40 double-sided 8-up forms per hour, the speed and accuracy of this system is unlike anything the industry has ever seen.

SpectroPocket for Android-

Digital Information’s SpectroPocket for Android represents a great stride in the portability and functionality of color measurement technology. For the first time, it is possible for smartphones or tablet computers to connect directly to scanning spectrophotometers via an external USB interface. Users can now measure color virtually anywhere with lightweight equipment—on-site at a customer facility, in the office, at the laboratory, on press—or, wherever their business takes them.

Ink Can Dispenser- NEW PRODUCT LAUNCH

Officially launching and being demonstrated for the first time ever at Graph Expo 2015, the Ink Can Dispenser is a press frame mounted dispenser which allows printers to automatically pump ink into the ink fountain using existing ink cans. The Ink Can Dispenser allows printers to pump UV or conventional ink from their existing 2.5 kg or 5.0 kg plastic or metal ink cans directly into the ink fountain while maintaining an even and accurate

ink distribution. Through the use of stainless steel manifold over the fountain and an ultrasonic sensor, the ink level in the fountain is controlled to within .375.”

Filter Klear Fountain Filtration System-

Utilizing advanced nanofiber technology featuring ceramic nanofibers on a micro-glass matrix, the Filter Klear Fountain Filtration System provides outstanding reduction of calcium, virus, bacteria, cysts, endotoxin and many other submicron particles through both electro-adhesion and mechanical processes, filtering particulates down to .002 microns.

For more information on the industry’s premier waste reduction and pressroom automation solutions, please contact CMYK Distributors, Inc. online at www.cmykdistributors.com or call Mark Williams, Director of Sales for CMYK Distributors, Inc. at 973-459-0524.

About CMYK Distributors, Inc.

CMYK Distributors, Inc., headquartered in Weymouth, MA, is the leading distributor and installer of graphics and printing products that bring automation and waste reduction technology to the industry, while conserving environmental resources. CMYK Distributors, Inc. is the exclusive distributor of Digital Information products in North America, including the renowned InkZone product line. CMYK Distributors, Inc. also has exclusive U.S. distribution rights to Filter Klear Fountain Filtration Systems by CECO Environmental. Most recently, CMYK Distributors unveiled the addition of the Ink Can Dispenser by Sajo Technologies to their product arsenal.
